

Cactus[®]

Cactus[®] welcomes Distributor OmegaBrandess for the United States of America.

Hong Kong, December 22, 2017 - Harvest One Limited, the innovative company that designs and engineers Cactus[®] wireless lighting equipment for photographers, today announced its new partnership for distribution with OmegaBrandess.

"We are excited to have OmegaBrandess on board," said Youn Ling, Director of Harvest One. "We have always wanted to expand our market and provide better customer support to customers in the USA. With Omegabrandess as our distributor, our goal is to continuously improve our customers' experience in every aspect, expand our network of sales and provide customer support within close proximity of our customers. We are convinced that this partnership will be beneficial to both of us and the wider US market."

About Cactus

Cactus is a company that designs and engineers wireless studio lighting equipment - wireless flash triggers, wireless portable flash, laser trigger, and other lighting and camera accessories. Meeting the needs of the photographer continues to be the driving force behind product development. In March 2017, Cactus launched the World's FIRST cross-brand wireless TTL flash transceiver V6 which overthrows the same-system rule in off-camera flash TTL, HSS and power control. It continues to innovate in the wireless lighting equipment market with excellent products for professional photographer and photography enthusiasts worldwide.

About OmegaBrandess

OmegaBrandess has manufactured and distributed photographic and imaging products for over 75 years. A privately held company, OmegaBrandess supplies the photography industry with over ten thousand products from dozens of branded lines.
